# E81T1-A1C/A1M DATA SHEET

Pinnacle Alloys E81T1-A1C/A1M AWS CLASS E81T1-A1C, E81T1-A1M **CODE AND SPECIFICATION DATA:** AWS A5.29 ASME SFA 5.29; UNS W17031

#### **DESCRIPTION:**

Pinnacle Alloys E81T1-A1C/A1M has a nominal composition (wt-%) of 0.5 Mo. Other than the addition of Mo, the filler metal is similar to those classified in AWS A5.20. This addition increases the strength of the weld metal, especially at elevated temperatures, and provides some increase in corrosion resistance. The molybdenum however, will likely reduce the notch toughness of the weld metal. Typical applications include the welding of C-Mo base metals, such as ASTM A 161, A 204 plate, A 302 Gr A plate, and A 335-P1 pipe. Preheat and interpass temperatures are typically kept between 275-325°F. This filler metal is used in the PWHT condition, typically around 1150°F for one hour.

**DIAMETERS:** .045", .052", 1/16"

NOTE: Parameters reflect  $CO_2$  shielding gas - reduce by 1-1½ volts when using 75-80% Ar/balance  $CO_2$ . Maintaining a proper welding procedure, including pre-heat and interpass temperatures, may be critical depending on the type and thickness of steel being welded.

**NOTICE:** The results reported are based upon testing of the product under controlled laboratory conditions in accordance with American Welding Society Standards. Actual use of the product may produce different results due to varying conditions. An example of such conditions would be electrode size, plate chemistry, environment, weldment design, fabrication methods, welding procedure and service requirements. Thus the results are not guarantees for the use in the field. The manufacturer disclaims any warranty of merchantability of fitness for any particular purpose with respect to its products.

**CAUTION:** Consumers should be thoroughly familiar with the safety precautions on the warning label posted in each shipment and in the American National Standards A49.1, "Safety in Welding and Cutting," published by the American Welding Society, 8669 NW 36 Street, #130, Miami, FL 33126: OSHA Safety and Health Standards 29 CRF 1910 is available from the U.S. Department of Labor, Washington, D.C. 20210.
